Summary

Software Engineer with almost 2 years of experience building scalable backend systems and microservices using Node.js, TypeScript, and GraphQL. Experienced in taking end-to-end ownership of backend features from design to production deployment. Strong background in optimizing system performance, improving reliability, and building production-grade services at scale.

Technical Skills

Languages: JavaScript(ES6+), TypeScript, SQL, Java

Backend & Core: Node.js, Express.js, GraphQL, REST APIs, Microservices, WebSockets, TypeORM

Databases & Message Queues: PostgreSQL, ClickHouse, MongoDB, Redis, RabbitMQ, Kafka

Frontend: React, Redux, HTML, CSS, Tailwind, Ant Design, Apollo Client

DevOps & Tools: Docker, Git, Grafana, Loki, Postman, Jira, Agile Methodologies

Experience

Associate Software Engineer

March 2024 – Present

IdeaClan – FabFunnel

Chandigarh, India

- Developed and maintained scalable backend microservices using **Node.js** and **TypeScript** for high-traffic systems.
- Built optimized GraphQL and REST APIs, implementing **GraphQL Federation** for inter-service communication.
- Developed high-scale Facebook and NewsBreak services from scratch, enabling in-platform campaign management.
- Integrated user ad accounts and synchronized ad spend data in near real-time, **reducing report processing time by 30%** through backend optimizations.
- Built a **Kafka-based** pipeline to stream data into **ClickHouse**, utilizing TypeORM with PostgreSQL for schema design and query optimization.
- Developed a highly scalable real-time notification service using **GraphQL subscriptions**, WebSockets, Redis Pub/Sub, and RabbitMQ to deliver instant user updates.
- Designed and built User Activity service using **Loki APIs** to transform application logs into activity insights.
- Implemented event-driven workflows using RabbitMQ to manage background report synchronization and asynchronous processing across services.
- Worked on frontend features using React, leveraging **Apollo Client** and **GraphQL Codegen** to build scalable, type-safe client applications.

Education

Masai School

March 2023 – February 2024

Full Stack Web Development, Computer Science

India

Maharaja Ganga Singh University (MGSU)

July 2020 – June 2023

Bachelor of Arts

Bikaner, India

Certifications

- Building RAG Apps Using MongoDB
- Postman API Fundamentals Student Expert
